

**Jason Cutter, Indiana**

**Rotor CFI**

**How long have you been flying?**

Airplanes for 34 years and helicopters for 6 years

**Why do you love to fly?**

It's freeing - for that period of time you get to leave everything behind and just concentrate on flying. I'm always in awe of the things we see as pilots that most people will never have the opportunity to see.

**Best piece of advice to share?**

Don't forget to have fun flying. Training is tough and requires a ton of concentration and hard work - take it seriously but don't forget why you're doing it... remember to have fun!

**Fun Facts:**

- I have a PhD in global leadership and my helicopter CFI lesson plan book has more pages than my dissertation
- I was a Starship captain in my earlier days (Beechcraft Starship :D )
